

ReadyReports

ReadyReports is a state-of-the-art business intelligence reporting tool that offers decision-makers a sophisticated window into the financial health of their business. ReadyReports is a Microsoft Excel-based report template that connects directly to corporate data and brings the analyst fast, customizable, and comprehensive reporting, all delivered in with a mouse click into the environment to which your analysts are already well-accustomed.

Using web services, ReadyReports connects to any data stored in a Microsoft SQL Server, DB2, or Oracle database or data warehouse and delivers 95% of your reporting needs without any customization. ReadyReports supports the Excel 2007, 2003, or 2002 platforms, and works from anywhere that has an internet connection.
